

# MOUNTAIN VIEW WORKS

CREATING SPACE FOR WHAT MATTERS

## Working Better Together

*Discover how your team naturally contributes and collaborates.*

Working Genius® Workshops

### Every team has talented people.

Even talented teams can become overwhelmed by competing priorities, unclear communication, and work that doesn't align with people's natural strengths.

Mountain View Works helps teams understand how they naturally contribute so they can work together with greater clarity, purpose, and energy.

Using the Working Genius® framework developed by Patrick Lencioni and The Table Group, I facilitate engaging conversations that help teams better understand how work gets done and how people naturally contribute.

#### What Teams Gain

- Shared language for collaboration
- Greater appreciation for individual strengths
- More intentional meetings and conversations
- Greater clarity around how work moves from idea to execution
- Practical ideas teams can apply immediately
- Healthier, more sustainable ways of working together

**Teams leave with a shared language, practical next steps, and greater appreciation for one another's strengths.**

## Signature Learning Experience

90-Minute Interactive Workshop | Virtually or in person

**Perfect for:** Leadership Teams, Volunteer Boards, Professional Associations, Nonprofit Organizations, Staff Teams

#### **Participants will:**

- Discover their Working Genius® profile
- Learn how work flows from idea to execution
- Explore team strengths and opportunities
- Improve communication and collaboration
- Leave with practical next steps

## The Mountain View Works Approach

Mountain View Works exists to help people and organizations create space for what matters. My role isn't simply to explain an assessment.

It's to create an environment where teams can slow down, reflect together, and discover practical ways to work better together.

Because when teams create space for thoughtful conversations, stronger collaboration, and meaningful contribution...better work naturally follows.
